

# DVA Community Nursing Module

**Alchemy Technology's Service Management System (SMS) is a community care software package consisting of a core standard package supplemented by a range of optional Modules that can be purchased as required.**

**alchemy**  
technology

(A summary of the Standard features is overleaf)

The **DVA Community Nursing Module** is one of the additional Modules for the standard SMS package. It assists with the recording and reporting of information required by the Department of Veteran Affairs.

**Alchemy is an approved Medicare software vendor for the submission of claims.**

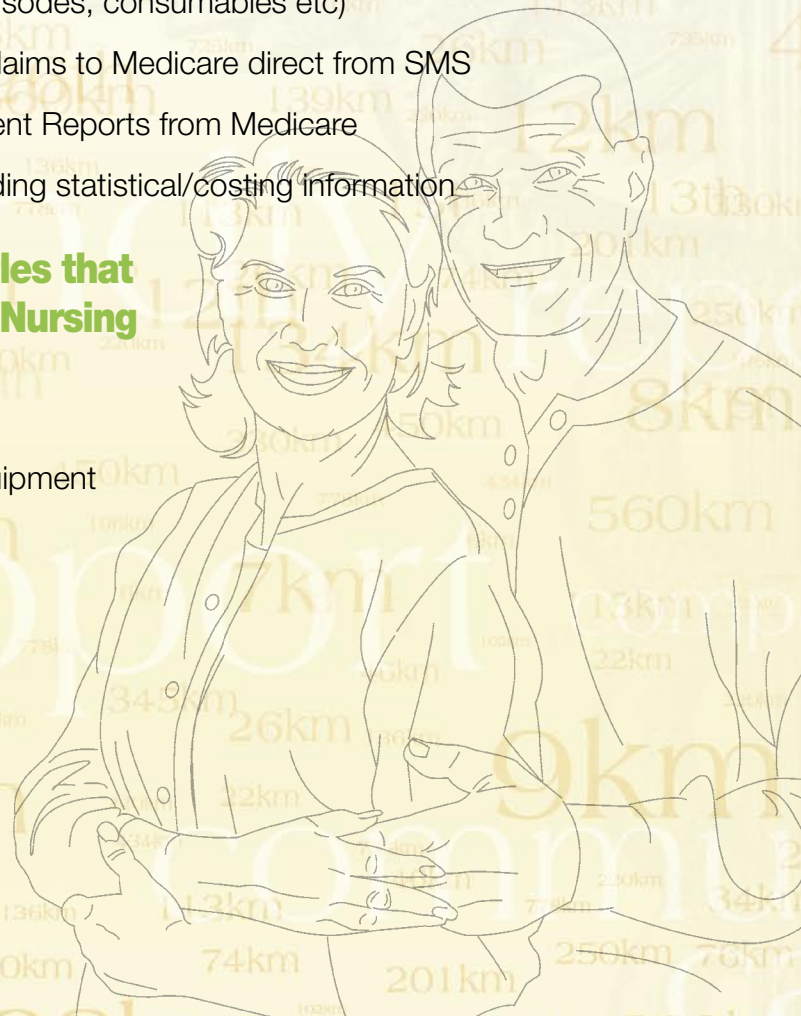

### **Additional benefits provided by the DVA Nursing Module:**

- Ability to enter and record all the information required for your DVA Nursing claim. (e.g. services, leave episodes, consumables etc)
- Ability to submit your online claims to Medicare direct from SMS
- Ability to extract Claim/Payment Reports from Medicare
- Range of SMS Reports providing statistical/costing information

### **Other SMS optional Modules that may also assist your DVA Nursing management:**

(see separate Factsheet)

**Equipment** (keeps track of equipment loaned and returned)

### **Purchase Costs and Support Packages**

Costs are based on individual organisations requirements of optional Modules and the levels of support package. A quote can be obtained by contacting our support staff.

# SERVICE MANAGEMENT SYSTEM (SMS)

## Summary of the core standard features:

*(you may not utilise all these feature immediately – you simply use what you need!)*

### **Client Management:**

- Personal records/care plans/case notes
- Service records for all service types/ assessments/reviews
- Client Fee invoicing
- Wide range of statistical reports

### **General Management:**

- Waiting List management
- Mail merge for letters and labels
- Complaints monitoring
- Brokered agency billing/costing
- Reports – wide range of reports available

### **Worker /Volunteer Management:**

- Personal records
- HR features
- Training records
- Summarise service hours for payroll
- Wide range of reports

### **Roster Management:**

- Mix 'n' Match various screens and functions to suit your preferred way of rostering
- Selection of client/ worker/ volunteer roster reports
- Ability to e-mail rosters direct from the system
- Integration with other SMS Modules (e.g. Payroll Links) provides further enhancement

## **Includes a powerful Feature no other database can give you**

### **A unique feature called Data Groups enables you to:**

- Categorise your clients workers and services into Groups to match your organisations structure (e.g. Day Centre, In Home, Transport, HACC, CACP, VHC etc)
- Have the option to log into a Group and only see client/ worker and service records assigned to it (e.g. Day Centre will only see Day Centre Clients, Workers and Services)
- Obtain a wide range of reports on each of your Groups...effectively every screen and every report!!

It is a very flexible feature that customises the Standard system to your individual structure.

Ask for a demonstration to see the benefits for your organisation.
