

# SMS Software for Commonwealth Home Support

**SMS Community Care Software is a complete and integrated solution to service and support for all your Community Care and compliance needs.**

The Commonwealth Home Support programme commences on 1 July 2015, replacing the former programmes for Commonwealth Home and Community Care (HACC), National Respite for Carers Program (NRCP), Day Therapy Centres (DTC) and Assistance with Care and Housing for the Aged (ACHA)

As part of this change the reporting requirements will change, to being a data submission to DSS via the "DSS Data Exchange Portal" and not the previously used Minimum Data Set (MDS) Reporting. Alchemy Technology are finalising the development to ensure SMS gives you a fully tested and proven software solution that will save time, improve efficiencies and ensure compliance.

## Benefits of SMS with CHSP Module

- View full client history on one client record including multiple funding sources and programmes for continuity of care
- Settings to have services provided as reported to funding body or internal use only.
- Validations and checking reports to ensure client details are entered as required by DSS to reduce errors in claims
- Document Storage allows for contracts, forms etc. to be stored within the client record having a one stop shop for all client information.
- Easily extract information from Client records into your own designed Word Templates for letters, forms, contracts etc.
- Wide range of reports for analysis of your recorded data
- Validating checks to ensure data is accurate before submission to DSS
- Ability to set income level fees in line with the national fee policy as well as standard and client specific fees
- Continuous Improvement of the system allows for various reports and functions to be developed as requirements are made available.
