

# Mobile Worker Web Interface

## The add on Module for SMS Community Care Software

*Mobile Worker Web Interface* is the perfect add on module for *Service Management System (SMS) Community Care Software*. Developed to meet a vital need in community care worker management, this module allows seamless connection and communication between head office (Program Managers and SMS) and off site care workers.

With no special hardware or app required, the *SMS Mobile Worker Web Interface* allows care workers to use any available internet connection to provide and receive rosters, timesheets and messages. Saving both time and money, (compared with the cost to your organisation for text messaging, faxing, devices, data plans etc), you'll be amazed at the benefits this module provides.

**View Rosters**

### Mobile Worker Web Interface Features

- Today's Roster
- Roster Feature
- Update Timesheet
- Apply for Leave
- Integrated Messaging Service
- View Plan for Service
- Secure Messaging
- Start & finishing times, location, dates & time stamped

**Mobile Workers can view and complete rosters, timesheets, leave applications, linked care plans and messages.**

### Benefits

- A simple to use web interface for mobile workers to update SMS adaptable by screen size
- No more manual writing & data entry of timesheets
- Avoid data entry, remove duplication of effort and eliminate errors
- Real time information, no time lag or problems with email accounts, mail server downloads and lost emails
- An internet connection is all that is needed - not computer hardware or phone specific
- No emailing, texting or faxing back and forth of rosters, timesheets, roster variations and carer/client feedback and tasking
- Complete and centralised Audit Trail of communications between organisations and carers
- Helps meet WH&S requirements for care worker start and end of shift/job confirmation
