

SMS Software for Home Care Packages and CDC

SMS Community Care Software is the complete and integrated solution to service and support for all your community care and compliance needs.

With the commencement of Increasing Choice in Home Care Reforms from 27 February 2017, the Home Care Packages Programme will allow consumers to move to Approved Providers they wish to and are no longer restricted by available packages at an organisation or funding region. Additional changes to the programme include the option to charge exit fees, the requirement to transfer or return unspent funds and produce exiting statements in addition to the requirement for ongoing budget statements to be provided to consumers.

SMS software with HCP and CDC modules gives you a fully tested and proven software solution that will save time, improve efficiencies and ensure compliance.

The Alchemy Home Care Package's module has been developed, tested and refined with many clients over the last two years to give you a simple and easy solution for community care operations and reporting. Our HCP & CDC Modules provides a complete package of features and benefits to seamlessly meet all your CDC and Home Care Package requirements using one software program... Alchemy Technology's SMS.

How SMS with HCP & CDC modules help you deliver Consumer Directed Care

- View full client history on one client record for continuity of care
- Episode of Care & Supplement Recording to allow history of package levels.
- Produce Proforma copy of Monthly Claim Form showing client episode of care and service details for ease of claiming based on rostered services, future development will allow for claiming interface.
- Setting to have services provided as reported to funding body or internal use only.
- Ability to record leave episodes by type and enteral/oxygen as required.
- Validation and checking reports to ensure client details are entered as required by DSS to reduce errors in claims
- Reports to check leave allocation and warn if consumer is over leave allocations allowed.
- Monthly Reports on package coverage to show gaps or over allocation of package numbers
- Document Storage allows for contracts, forms etc. to be stored within the client record

Benefits provided by the CDC Module:

- In-built validations ensure information is accurate.
- Ability to record client budget allocation and costs
- Ability to enter administration charge and contingency amounts
- Produce a Budget Statement for Clients
- Various Other CDC specific reports

SMS... Everything you need for CDC and Home Care Packages

With the SMS HCP and CDC Modules, you can now produce a Monthly statement to each client, providing information of their package (budget) value, which services have been used, how much that is worth and how much of their funding is remaining including contingency. This meets the full and transparent communication requirements of Home Care Packages and the CDC Approach.

Complementary Modules Available;

- Interfaces – If Using External Budgeting or Accounting Systems data can be exported as required.
- Mobile Worker Web - to allow field staff to remotely access their rosters and login and out of services as they occur, providing time & attendance recording
- Remote Client File Access - Providing remote access to client files for field staff that need to enter notes, documents and update client details.

5 Ways SMS Software improves your Quality of Care & Staff Productivity

- 1) Fully featured & specialised Community Care software that saves you time
- 2) Easy to use software designed in consultation with care coordinators and managers
- 3) Friendly & prompt support is provided by experienced community care staff
