

CDC and CHSP are HERE

and the Government has allocated \$40 Million in Funding to assist in the transition

Alchemy Technology and our Service Management System (SMS) Software has always been at the forefront of Industry changes, testing and refining our Community Care Software to manage consumer directed care, package and program service management, budgeting and reporting requirements.

With CDC and Homecare now live (as of July 1, 2015) and CHSP currently in transition period from July 1, 2015 - Oct 31, 2015, Alchemy Technology is now being inundated with requests for SMS software installations and training.

Furthermore, the recently announced \$40 million in government funding for transition to the new reporting is also stimulating the NEED IT NOW approach of a large number of community care organisations. In an effort to effectively, install, implement, train and support each organisation, we need prompt action on your part to register your interest now so we can timeline and prioritise our sales and support (more details below).

SMS will provide your care organisation with a robust and flexible system to meet reporting requirements from the beginning of your implementation. Clear communication and reporting is the key to ensuring your organisation survives and thrives, hence why an easy to use, fully functioning management and reporting system is now a MUST.

With CDC you need a system that will enhance your relationship with the clients, give transparency and confidence to the client that they are in control of the funds. Obviously compliance with the appropriate package requirements and audits are further important reasons to act now.

If you have any interest in knowing more about SMS, we'd like to ask that you Register Your Interest for either a **15 minute Phone Conference with On Screen Run Through**, or book a more comprehensive **60 minute demonstration**.

By registering your interest now, we will be able to run through options and discuss implementation timeframes and costs with you. More importantly you will enter our tentative job queuing system ensuring that if you do decide to go ahead, you will not be waiting for many months...something that will be inevitable for the slower moving community care organisations. There is also no guarantee on how long transition funding will be available, so take the opportunity to register your interest now.

Register your interest now by calling us directly on 1800 008 498 or via our website www.alchemytechnology.com.au

SMS...Complete System for your Community Care Needs

Alchemy Technology's Service Management System is a Community Care Software Program with a core package for Client, Roster, Worker, Volunteer management with 'add-on' modules to complement.

Complementary Modules Available;

- Interfaces – If Using External Budgeting or Accounting Systems data can be exported as required.
- Mobile Worker Web – to allow field staff to remotely access rosters with login and out recording for time and attendance.
- Meals on Wheels/Delivery – Produce customised meal labels, delivery run sheets, with client specific delivery instructions etc.
- Travel Distances & Times – Travel services can be populated into the roster based on the distances with a link to Google Maps.

5 Ways SMS Software improves your Quality of Care & Staff Productivity ;

- 1) Fully featured & specialised Community Care software that saves you time
- 2) Easy to use software designed in consultation with care coordinators and managers
- 3) Friendly & prompt support is provided by experienced community care staff
- 4) Exceptional value software with all inclusive ongoing support packages
- 5) Reputable software developer up to date with industry changes

Call 1800 008 498 to book a 15 minute "On Screen Demonstration" of SMS and its complementary modules with our Community Care Software Specialist.
Following this demonstration, we will then provide you with customised pricing and further options, organise purchase, installation and associated training timeframes.
