

NDIS for Service Providers

The add on Module for SMS Community Care Software

The NDIS (Formerly Disability) module for the Service Management System (SMS) that is used by providers of NDIS/Disability service to consumers. We have been working with providers of Disability services for over 10 years and with our recent updates to cater for new requirements, the NDIS module is designed to assist providers with their community care operations.

With the nation-wide roll out of the National Disability Insurance Scheme (NDIS), beginning in July 2016 it is anticipated the scheme will revolutionise the way people with disability receive the services and supports they need to actively contribute to Australian life. It will bring life-changing benefits not just to their lives, but also their families, carers and communities.

NDIS & SMS Features

In-built validations on information

Data audit trail to view changes etc

Single Client Record across multiple funders & groups

The NDIS module assists providers to;

View full client history on one client record for continuity of care

Record service/support provision, notes and client documents

Prepare and Manage Rosters

Produce invoices and claims for supports provided

Other Complementary Modules Available

Mobile Worker Web - *to allow field staff to remotely access rosters, timesheets and record time and attendance.*

Remote Client Files - *Providing remote file access to client/consumer records to update file, plans, documents etc while planning with the client.*

Interfaces – *Various interface formats are available for exporting to Accounting for payroll, invoicing etc.*
